

## MICHAEL SEAN STOLWORTHY

### Designer

A technology driven designer with an intrinsic passion for creating extraordinary things, Stolworthy pushes the boundaries of style with his bespoke works of art. Approaching his designs with an unconventional perspective, he finds a true sense of creation in exploring the possibilities of form through digital technology and emerging manufacturing processes. His studio was born out of a long stemming desire to branch out from the daily grind of the corporate world to do something niche and peculiar for the luxury market. Fascinated by the sinuous anatomy found in nature, he began his studies in ornamental horticulture and plant biology, later going on to study a diverse curriculum in traditional arts & digital design. His career has been cultivated through creative roles designing and creating animated visual effects, digital media art, stage and event designs, exhibitions, and furniture & objects. He's designed for clients such as Oprah, Ferrari, Microsoft, Samsung, LVMH, the Burj Al Arab, and Las Vegas resort hotels. Stolworthy resides in Las Vegas, NV with his wife and two children.
