GOOD ENOUGH TO EAT

*Tuck into dinner with...vegetables.
Experiments with PLA bioplastics give
veg impeccable table manners*

Ⓢ KI

Torsion on the Go! Seating from KI, designed by Giancarlo Piretti, is an innovative, mobile, nesting, flex-back chair which addresses movable seating requirements for teaming, training, and informal conferencing - great for impromptu meetings. With a unique large folding and nesting tablet arm, ingenious flip-up seats and castors, the chairs can nest together for compact "out-of-the-way" storage. Torsion on the Go! Is an intelligent approach to the requirements of multi-purpose meeting, training and conference environments. Exceptional comfort is provided by a smooth back articulation created by a unique patented torsion spring mechanism. All KI seating products meet the more stringent requirements of Indoor Advantage Gold (from SCS Global Services). kieurope.com

Ⓢ LEISURE PLAN

A versatile range of dining tables, with the opportunity to personalise the table top. Choosing a central runner from six different materials to co-ordinate or contrast with the sleek aluminum top, achieves a level of individualism for which Egoparis' products are so renowned. Stainless steel planters or trays can also be placed within the table runner for additional decorative possibilities. All these features combined with solid brushed stainless steel leg supports gives this table a truly elegant personality. leisureplan.co.uk

Ⓢ WARINGS FURNITURE

The Chapel Chair is a design classic that will lend a sense of history to your venue. Until now, similar 'church-style' chairs were only available as reclaimed, without warranty and unlikely to be robust enough for a busy hospitality environment. Now, thanks to Warings Furniture, you can achieve the vintage look with this durable, solid beech piece which comes with 12 months warranty. Plus, Warings' skilled team of craftspeople give you the advantage of bespoke options such as colour, finish and upholstery. waringsfurniture.com

Ⓢ TABISSO

Futuristic, or 60s revisited? Both. A product of our era quite obviously connecting common design heritage to new horizons. 'My point is that design is not just a response to a functional need, it also brings a poetic, narrative dimension', explains French star designer Noé Duchaufour Lawrance in his approach for the new collection Ciel! This unique range of high-end armchairs is geared towards the Contract and the hospitality market - fine smooth shapes with taut lines for a very generous and welcoming result. The five models offer a broad array of customisation regarding material and bases, allowing to come up with the perfect match when designing interiors as diverse as restaurants, hotels, offices or residential. Sustainability is a core element of this range. Notably the use of 3D wood moulding, allowing to give its complex shape to the shell structure, helps reach the environmental goal and also makes it one of the first furniture reference project to use this technology. tabisso.com

Ⓢ VIASIT

Pure with its clean crisp and defined lines is a classical family of conference, meeting and lounge chairs, ottoman and tables. The fully upholstered contoured shell, deep padded upholstery, curved arms and cross stitched detailing deliver style and quality to any application. Pure Conference chairs feature memory gas lift and return and traditional knee tilt mechanisms with a choice of 4 or 5 star bases. Pure by name and Pure by nature. viasit.co.uk
